

Emergency Instructions

If you witness an Emergency...Do this:

- ◊ Using the nearest phone -- Immediately dial 911.
- ◊ Remain calm -- speak clearly and slowly to the operator.
- ◊ Give your location and explain the nature of the emergency.
- ◊ Follow the instructions of the operator.

About 911:

- Hawaii's enhanced 911 system provides for rapid communication to Fire, Police, and Emergency Medical Services (EMS) personnel.
- The responding operator will determine what emergency services are required and will forward your call to the appropriate Dispatch Center.
- The Dispatch Center operator has expertise and knowledge to assist in your specific situation and may request additional information from you or provide you with instructions on how to protect yourself or others.

Public Warnings --- On the Island of Oahu, warnings of emergencies are communicated to the public by means of **Civil Defense Warning Sirens** and the **Emergency Alert System (EAS)**.

- **About Civil Defense Emergency Warning Sirens**

- **If you hear a steady, 3-minute siren tone...Do this:**

- ◊ Tune-in to any Oahu radio or television station.
- ◊ Listen for emergency information.
- ◊ Take necessary protective actions as directed during the broadcast.
- ◊ Stay tuned for further information and instructions.
- ◊ **Note:** Siren warnings will be repeated as necessary.

- **If you hear a wailing (rising and falling), 3-minute siren tone...Do this:**

- ◊ **Seek shelter immediately.** (This warning signifies that an enemy attack has been detected or is imminent.)
- ◊ Tune-in to any Oahu radio or television station.

- ◊ Listen for emergency information.
 - ◊ Take necessary, protective actions as directed during the broadcast.
 - ◊ Stay tuned for further information and instructions.
 - ◊ **Note:** Siren warnings will be repeated as necessary.
- **About the Emergency Alert System (EAS) ---** If you are tuned-in to a local radio or television station when a public warning is issued, the EAS will interrupt normal broadcasting and a special Civil Defense announcement will provide vital emergency information.
- Public warnings, issued via the EAS, may contain instructions to evacuate specific areas, following designated routes, or they may advise listeners to “shelter-in-place” by going indoors and closing exterior doors, windows and vents.
- **If you hear an EAS warning message, do this:**
 - ◊ Listen for emergency information.
 - ◊ Take necessary protective actions as directed during the broadcast.
 - ◊ Stay tuned for further information and instructions.
- When an emergency affects the entire State of Hawaii, State Civil Defense will decide whether an EAS message should be broadcast by radio and television stations throughout the State.
 - When an emergency affects only Oahu, the City and County of Honolulu, Department of Emergency Management (DEM) will normally decide whether an EAS message should be broadcast by local radio and television stations. State Civil Defense backs-up DEM in this process.
 - When an emergency affects only Campbell Industrial Park, Kapolei Business Park and surrounding communities, the Honolulu Department of Emergency Management will normally act on advice from an on-scene emergency response organization (often, the Honolulu Fire Department) to decide whether a special Campbell Industrial Park-oriented message should be broadcast.
- Notes:
 - Because regular radio and televisions stations are used, EAS warnings are heard throughout the normal broadcast area of the

station. Unlike most EAS warnings, however, special “Campbell Industrial Park” messages do specifically refer to the Park as the focal point of the emergency.

- The EAS is not necessarily activated for all emergencies. This is especially true if, in the judgment of emergency responders, an emergency does not have a community-wide impact.
- **About Emergency Alert Sentinel Radios ---** Specially engineered radio receivers, known as “Emergency Alert Sentinels” have been placed throughout the Campbell Industrial Park and Kapolei Business Park communities to enhance the probability that EAS warnings will be heard at the time they are broadcast. When a local radio station broadcasts an activation signal, the Emergency Alert Sentinels, automatically turn-on so the emergency alert message can be heard.
- State Civil Defense has provided Emergency Alert Sentinels to all public schools in the State.
- C.L.E.A.N has provided more than 500 Emergency Alert Sentinels, free-of-charge, to a wide range of businesses, community service organizations, educational facilities, government facilities, health services providers, public centers, religious facilities, response organizations, and others in the Campbell Industrial Park area.
